

Did you know?

We notice that greater emphasis can be provided for the following areas:

For more information on submitting robust reviews, please view the [Conducting Quality Reviews learning module](#) on our website.

1

Expertise, Experience and Resources

Each evaluation criteria, according to the Funding Opportunity, should be addressed by noting strengths and weaknesses that provide the applicant feedback and justification of the rating.

2

Sex and/or Gender Considerations

Reviewers must provide written recommendations to applicants on how they might improve the strength of their applications with respect to the integration of sex and/or gender.

3

Summary of Research Proposal

At times, the summary section of a review is copied from the application or other reviews. Using original wording demonstrates the reviewer's understanding of the research work being proposed.
